High Quality

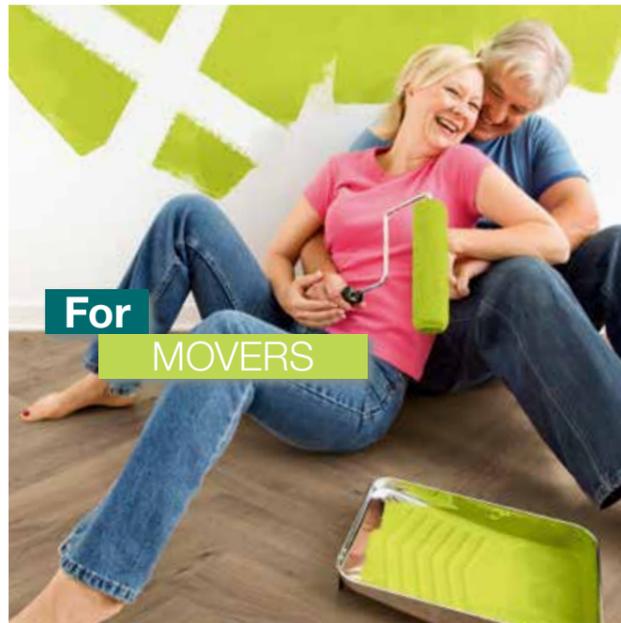

Made by Kronospan

Your floor. Your way.

**X-WAY.**  
**Because it is as strong as laminate.**  
**And as stylish as parquet.**

**For**  
**MOVERS**

**For**  
**CREATIVES**

Almost everyone has laminate flooring in their home. There are many good reasons for this. It looks terrific, is resistant to wear and tear, easy to clean and simple to install. High-quality laminate from KronoOriginal® is virtually indistinguishable from a “real” wooden floor. It’s no wonder that laminate flooring can be found in so many households.

For all those who aren’t satisfied with the wide selection of laminate flooring available, however, KronoOriginal® developed X-WAY. A flooring material in tried-and-proven laminate quality that can be installed any way desired. While individual panels are always installed next to each other in rows in classic laminate flooring, X-WAY offers countless installation alternatives.

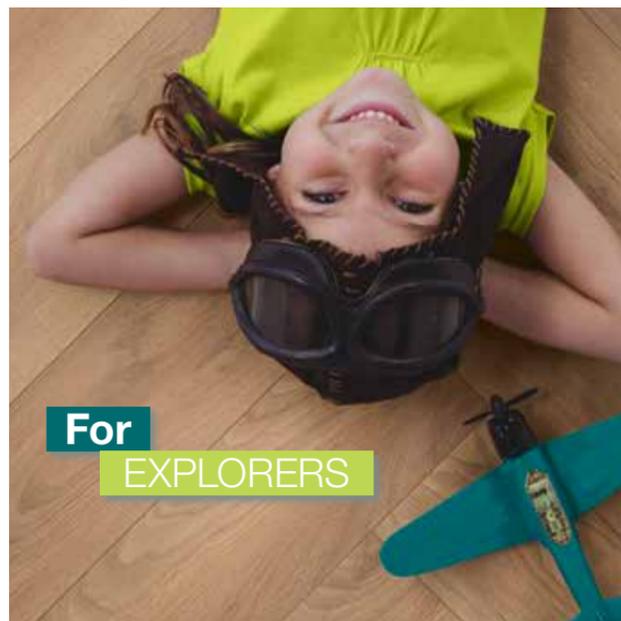

The innovative 360-degree Quattro Clic installation system enables creation of highly individualized flooring layouts. Herringbone, square, trim or combinations of your own choosing – the possibilities are endless! Get creative!

**X-WAY is ready for ANYTHING.**

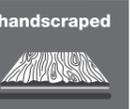

**For**  
**DESIGNERS**

**For**  
**EXPLORERS**

X-WAY offers:

- an Authentic Embossed structure for sophisticated contrasts and marked structural depth
- handscraped design for an especially natural looking surface inspired by traditional craftsmanship
- V-groove on all four sides of the panel gives X-WAY the look of a real wooden floor
- unlimited installation patterns thanks to 4:1 aspect ratio

## X-WAY. Because simply being better is now even easier.

### X-WAY is innovative.

No other flooring with creative installation possibilities is as easy to lay. No costly or complex tools are required. You can easily lay X-WAY yourself with little effort, just like normal laminate flooring.

### X-WAY panels always fit each other.

You do not have to connect different types of panels with various edges to each other or calculate the amount of each type needed beforehand. Simply break off the groove lip on the side on which it is not needed. Waste is minimized. This is an innovation – and exclusive to X-WAY.

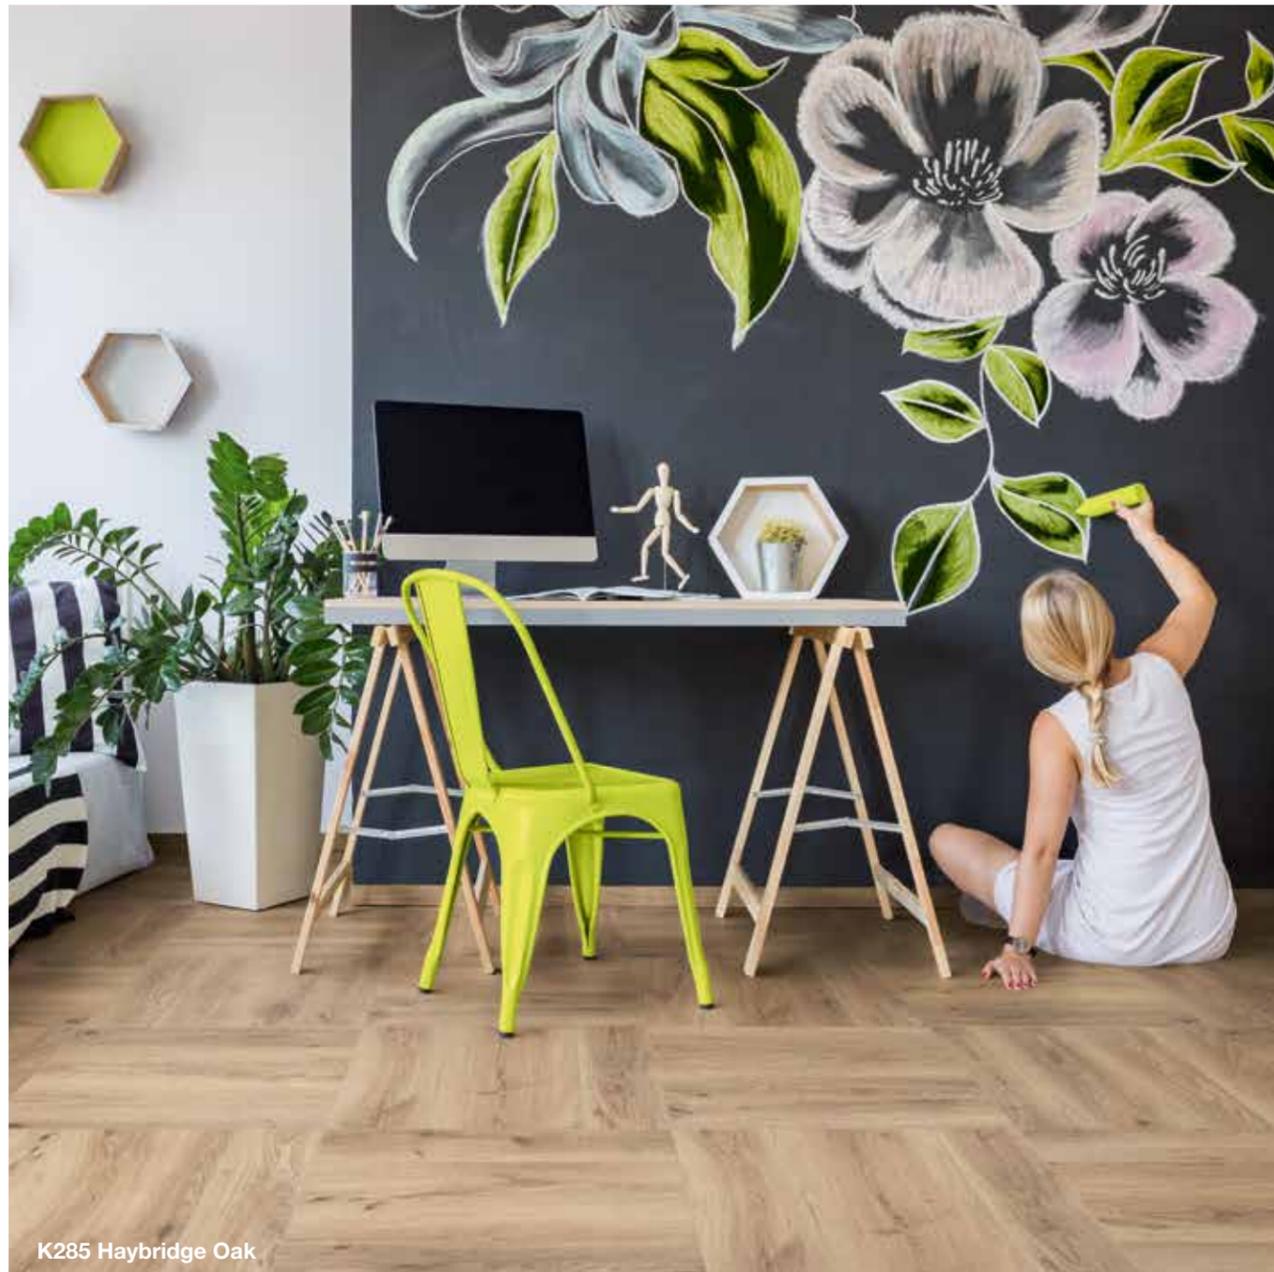

### X-WAY is:

- available in two different sizes that can be combined any way desired
- as variable as parquet
- as easy to care for as laminate
- splash-proof
- specially protected against microscratches – for pet owners
- perfect for children's rooms thanks to A.B.C. Anti Bacterial Coating\*
- easy to install even in difficult locations (corners, doors and under radiators)
- environmentally friendly and healthy

\*Bacteria tested: Staphylococcus aureus

**X-WAY.**  
**Because this floor is exactly  
what you want.**

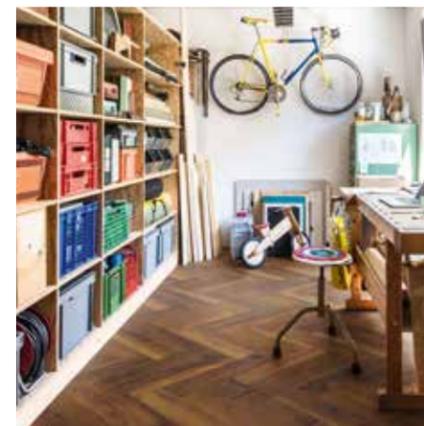

K285 Haybridge Oak

“Laminate is practical. But it is always installed row on row. With X-WAY, I can lay the flooring just the way I want it.”

“I wanted a natural-looking floor to underscore my individuality. That didn’t exist. Until now!”

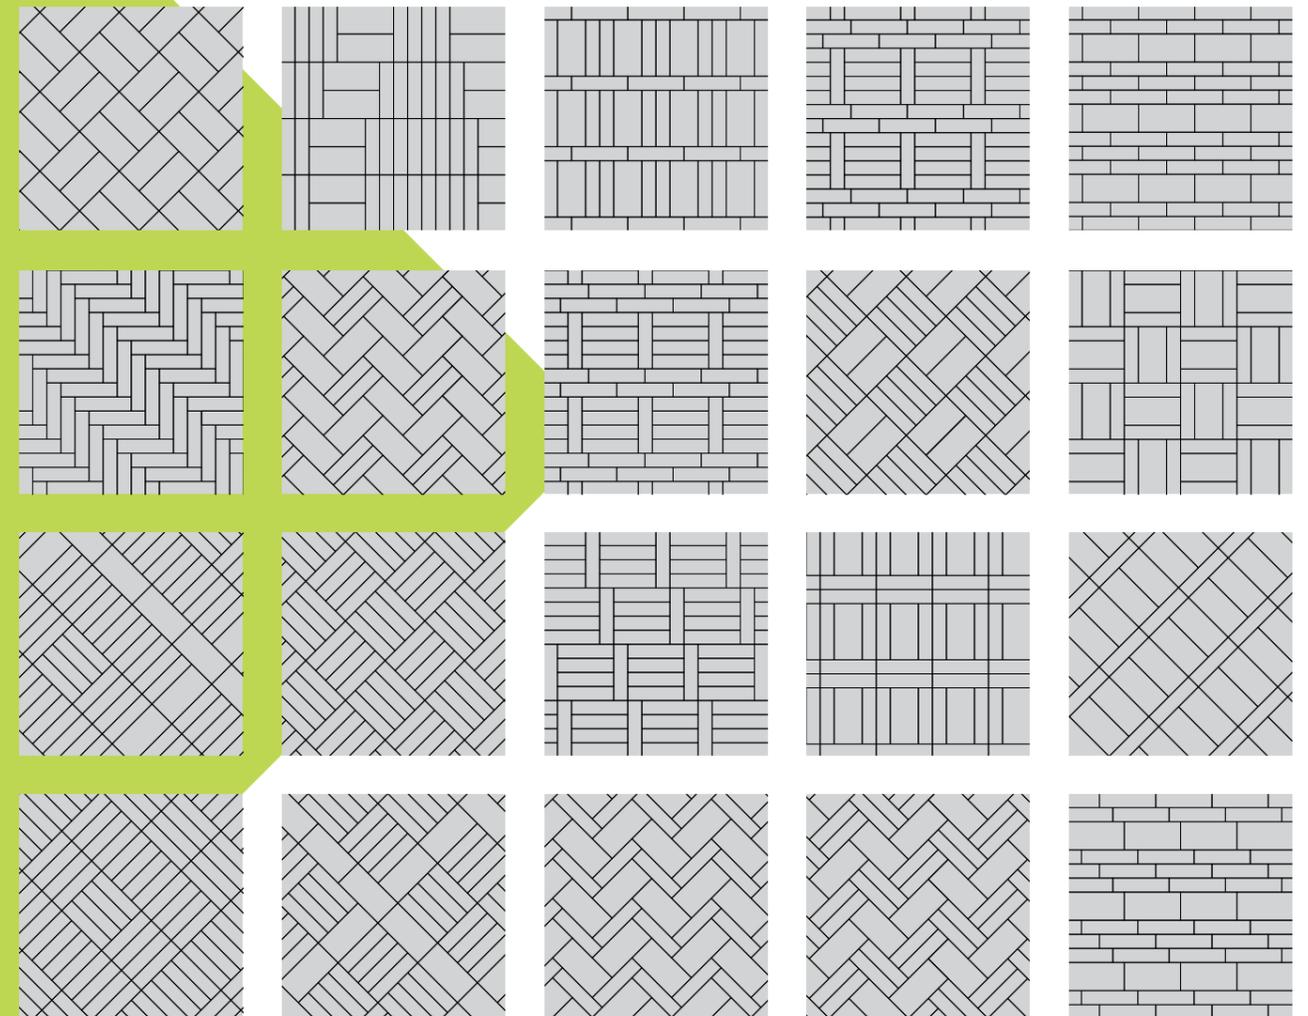

“Parquet is beautiful, but difficult to install. X-WAY is a new alternative that I can install myself.”

**X-WAY.**  
**Because there are no  
limits to your creativity.**

The possibilities with  
X-WAY are endless and  
as flexible as your creativity.

This is just a small selection of  
possible installation patterns.

## X-WAY.

Because you want to keep it simple,  
and you can.

The X-WAY system is as simple as  
it is ingenious. You can easily install  
this flooring yourself.

1.

In its original state, every panel has a groove lip on all four sides. You can turn any side from a groove side into a tongue side by simply breaking off the groove lip with your hands.

2.

You will need to remove the groove lips on one or two sides, depending on your installation pattern.

3.

Apply a little glue to the already installed panel. Now press the next panel on manually. Use a damp cloth to remove any excess glue oozing from the joint.

4.

In principle, panels can be installed in any direction. The outer edge of the groove lip must still be present (e.g. not broken off yet), however. It is therefore advisable to install in one direction only.

Complete installation instructions are available here or at:
